Patient's Comment

With CardioClean Medicine my Ejection Fraction Increased from 23% to 50%

My name is Umesh Kumar Kejriwal. One year ago I suffered from chest pain and breathlessness. Then I went to Woodland Hospital and there I meet Dr. S.B. Roy and after that my treatment was started and that time my ejection fraction was 23% (very low). I was told that 15% was the bare minimum to be alive. I was treated with medicines for 7 months, after that my angiography was done and the reports show multiple blockages in my coronary arteries of my heart.

Dr. S.B. Roy advised me to do an angioplasty or By-pass surgery to be done immediately. During this period my friend informed me about Dr. Bimal Chhajer and without delay I consulted Dr. Bimal Chhajer and from there I came to know Reversal of Heart Diseases is possible. Now I am following all his instructions and change my life completely. I started Zero Oil Food, Walking, Yoga etc. Dr. Bimal Chhajer advised me CardioClean Medicine for

my Heart Blockge i toke 60 sachets. One sachet everyday for 30 days then a gap of 15 days and other 30 sachets for next 30 days after a month i realize that i am getting benefit from his Medicine. On 17th July 2012 I went for another Echo cardiogram and to my surprise the EF which was just 23% was increased to 50%. My angina and breathlessness also disappeared.

I must thank to Dr. Bimal Chhajer for his advance treatment and changing my lifestyle.

ECHO Report	Before Treatment 31-05-2011	After Treatment 04-07-2012
LVEF	23%	50%
